

# SAT-MTC Multi-Transport Controller

More data, Better proxy, Faster workflow

powered by **SAT** Smart Acquisition Technology™

**NLT's SAT-MTC provides an unlimited amount of metadata control during acquisition. The most flexible and easy to use DVR control and data entry system**

NLT has taken SmartLogging to the next level with remote data entry and control of SAT-2000s over a standard Ethernet Network. Use a tablet PC, wireless network or any PC to control a set of Transports. Collect live logged comments directly to the recorders

Downconvert HD 24P projects with DV25 advance profile and get 24 frame offline footage with Metadata. Continue to generate Windows Media formatted content as a lightweight distribution of dailies. Preview on any PC that has Windows Media Player 9 or greater. The 24 Fps workflow is compatible with Avid, match back to HD or DNxHD

## Features:

- **Compatible** with any Windows 2000 or XP computer, or tablet PC
- **Timecode**
  - **LTC input**
  - **Synchronized** SD and Windows Media Proxy files
- **Metadata** entry to multiple recorders
  - Common clip names
  - Auto increment names
  - Metadata entry to all recorders
  - Recorder specific metadata entry
  - PC UI controls all recorders
  - Feedback recorder status
- **Unique Unit Number** provides multi-camera angle identification
- **Control or controllable**  
Use the Record, Retroloop, Stop buttons or be triggered with a deck control unit over the serial port

**Simultaneously create Windows Media™ content as a proxy while recording high resolution content to a memory stick or FieldPak**

## Benefits:

- **Studio production and digital dailies** of 24P projects in Proxy (DV25 and Windows Media formatted content)
- **Easily enter and manage your data**
- **View and continue to Shoot**, Remove the USB device to review proxies while content is still being acquired. Replace the USB device and continue the proxy capture
- **Keep everything**, disk space is not an issue to keep a Proxy history of all your video assets
- **Sort on Metadata, locate desired video segments fast, quickly discard bad shots**
- **Share Proxy** with staff members on USB memory sticks, CDs, DVDs, network shared storage, email or web site distribution
- **Control** your metadata from the start of any project
